

## INDEX

- Ackermann, patent process, 394, 399  
 Acetylene, as cementation agent, 65  
 Agricola, publications of, iv  
 Aired bars, 214  
 Aluminium steel, cementation of, 52  
 America, manufacture of cement steel in, ix  
 American Gas Furnace Company, Machlet furnace, 287  
 American Gas Furnace Company furnace, 282  
 American Spring Co., patent process, 396  
 Ammonia, cementation in, 50  
 Ammonium cyanide, cementation by, 50  
 Andre, patent process, 392  
 Annealing, apparatus for, 340  
 Anti-cements, 57, 68, 279  
 Armor steel, Krupp, cementation of, 333  
 Arnold and MacWilliam, investigations of, 33  
 Arnold, investigations of, 217  
     on the microchemistry of cementation, 32  
 Asphalt, cementation by, 17  
 Astorri and Giolitti, investigations of, 114  
 Astorri, investigations of, 121  
 Automatic limitation of cementation, 55  
  
 Bannista and Lambert, cementation tests of, 69  
 Barium carbonate, cementation by, 50  
     cementation with, 113  
     first used by Caron, xiv  
     use in cementation, 263  
 Bates, cementation patents to, 202  
     patent process, 392, 399  
 Bauer, review of Guillet's memoir, 59  
 Beck, Geschichte des Eisens, Extracts from, iv  
 Behrens, experiments of, 30  
 Bell, cementation experiments of, 27  
     investigations of, 189  
 Benedicks, on stability of cementite, 159  
 Benzene, cementation by, 114  
 Bergman, investigations of, xii  
  
 Berjot and Portevin, investigations of, 136, 372, 387  
 Berthollet, cementation theory of, 3  
     on the constitution of steel, xi  
 Bertram, practice of cementation by, viii  
 Bildt, cementation furnace, 209  
     investigations of, 217  
 Biringuccio, publications of, iv  
 Blasenstahl, 215  
 Blister bar, manufacture of, ix  
 Blister steel, 215  
     cause of production of, 22  
     manufacture of, viii  
 Blisters on steel, theory of, 216  
 Bones, cementation by, 271  
 Bonnoiret and Charpy, investigations of, 124  
 Boron, diffusion of, into steel, 339  
 Boudouard, investigations by, 189  
 Boussingault, cementation theory of, 23  
     investigations of, 219  
     studies of, 19  
 Boxes for case hardening, 226  
 Boyle, patent process, 396  
 Braune, on nitrogen in cementation, 68  
 Brinell, harness test, 381  
 Brown scintilla, cementation by, 271  
 Bruch, investigations of, 65  
  
 Cages used in cementation, 323  
 Cailletet, experiments of, 113  
     investigations of, 14  
     on permeability of iron to gases, 14  
 Campbell, on diffusion of sulphur in iron, 38  
 Carbides, metallic, diffusion of, 338  
 Carbon and iron, equilibrium diagram of, 102  
 Carbon, cementation by, 48  
     cementation in nitrogen by, 120  
     in vacuum by, 116  
     cement, exhaustion of, by use, 19  
     diffusion velocity in iron, 37  
     dioxide, cementation by, 129, 135

- Carbon dioxide, equilibrium diagram with carbon, 165  
equilibrium with carbon, 150
- Carbon, distribution of, 107  
equilibrium diagram with CO<sub>2</sub>, 165  
with carbon dioxide, 150  
with carbon monoxide, 150  
granular, as cementing agent, 322  
monoxide, Bruch's experiments with, 65  
cementation by, 10, 44, 55, 76, 114, 116, 131, 136, 142, 150, 183, 185  
cementing action of, 8  
effect of isolated action, 332  
theory of cementation by, 86
- Carnevali and Giolitti, investigations of, 76, 88, 99, 126, 131, 140, 141, 142  
on malleable castings, 98
- Carnevali, Giolitti and Tavanti, investigations of, 167, 195
- Caron cement, 270
- Caron, cyanide theory of, 5, 6  
discussion with Fremy, 8  
discussion with Margueritte, 11  
investigations by, 10  
process of cementation, xiv
- Case hardening, 222  
by compressed gases, 142  
by mixed cements, 302  
cost, 325  
origin of, iv  
with gaseous cements, 286  
with liquid cements, 279
- Cattaneo and Faggein, patent process, 392
- Cementation, control of, 358  
lowest temperature of, 88  
metallic, 336, 338  
mixtures, 262  
processes, special, 391  
special, 336  
temperature, control of, 362
- Cementite, stability of, in cementation, 159
- Cement, mixed, rules for cementation by, 158
- Cements, gaseous, case hardening with, 286  
liquid, case hardening by, 279  
mixed, case hardening by, 302
- Charcoal, quality of, for cementation, 261  
quality used in cementation, 205
- Charpy and Bonnoiret, investigations of, 124
- Charpy, investigations of, 42, 44, 54, 111, 148
- Chemical composition of nickel steel, 360  
of ordinary steel used, 359
- Chenot, cementation patent to, 202
- Chromium, action of carbon monoxide on, 56  
cementation of, 112  
diffusion of, into steel, 339  
compounds, used in cementation, 398, 399  
-nickel steel, cementation of, 333, 337  
cemented, heat treatment of, 355  
chemical composition of, 361  
mechanical properties of, 361  
steel, action of carbon monoxide on, 56  
cementation of, 52, 53, 113, 141, 145, 267  
cemented, heat treatment of, 355  
-vanadium steel, cementation of, 361
- Clouet, investigation of, 8
- Coke, as cementation agent, 264
- Colson, investigations of, 25
- Composition, chemical, of nickel steel, 360  
of ordinary steel used, 359
- Compressed gases, case hardening by, 142
- Control of cementation, 358  
of cementation process, 370
- Coomes and Hyde, patent process, 394
- Cost of case hardening, 325  
of cementation, with solid cement, 277  
of cement steel, 221
- Cowden, patent process, 395
- Cracks, hardening, explanation of, 109
- Cyanid-Gesellschaft, patent process, 394
- Cyanide, potassium, furnace for using, 282
- Cyanides, cementation by 44, 48, 113, 171, 181, 184
- Cyanogen, first use as cementation agent, xiii
- Davis, patent process, 396
- Deformation of cemented steels in heat treatment, 356
- Depth of cementation, 73

- Deville, on permeability of iron to gases, 14
- Diamond, cementation action of, 26  
cementation by, 8, 27
- Diffusion of carbon into iron, 25  
of elements into iron, 35, 39  
of metals into steel, 339  
velocity of carbon, 37
- Dion-Bouton cementation process, 278
- Distribution of carbon, in cemented zones, 66, 70, 73  
theory of, 107
- Double quenching, usefulness of, 110
- Eaton, investigations of, xiii
- Einsatzhaertung, 222
- Electrical cementation processes, patents for, 396
- England, start of cementation in, viii
- Engles, patent process, 394
- English method of cementation, xiii
- Equilibrium diagram of carbon and CO, 150  
of carbon and CO<sub>2</sub>, 165  
of iron and carbon, 102
- Etching of cemented steel, 372
- Ethylene, cementation by, 76, 114, 131, 142
- Examination, microscopic, of cemented pieces, 389
- Exfoliation of cemented pieces, 91  
rules for avoiding, 110
- Exhaustion of carbon cement, by use, 19  
of carbon in cementation, 206  
of cements, Ledebur on, 61
- Faggein and Cattaneo, patent process, 392
- Faraday, on nitrogen in steel, 7
- Ferguson furnace, 235
- Fery, pyrometer, 365
- Fiber of cemented products, 377
- Five-Lille furnace, 256
- Flavite, function of, in cementation, 139
- Fletcher furnace, 244  
for mixed cements, 307
- Forquignon, researches of, 25
- Forquignon's experiment, explanation of, 168
- France, beginning of cement process in, ix
- Fremy, discussion with Caron, 8  
original memoirs of, 7
- Furnace, American Gas Furnace Company, 282
- Bildt, 209  
cementation, ordinary, 207
- Ferguson, 235
- Five-Lille, 256
- Fletcher, 244  
for mixed cements, 307  
for liquid cements, 281
- Hertsch, 244
- Machlet, 287
- Reiser, 282
- Rockwell, 249
- Societa Italiana of Turin, 253
- Stein, 254, 256, 295
- Stein and Company, 242
- Furnaces for case hardening, 228
- Gallet, patent process, 392
- Garnier, investigations of, 28
- Gas, inert, effect of, on cementation, 330
- Gaseous agents, cementation by, 76, 114, 182  
cementation agents, 55, 65  
cements, case hardening with, 286  
first use of, xiii
- Gases, compressed, case hardening by, 142  
permeability of iron to, 14
- Gay-Lussac, cementation theory of, 4
- Germany, start of cementation in, viii
- Gherardi, investigations on malleable castings, 98
- Giesen, investigations of, 267, 269
- Giolitti and Astorri, investigations of, 114
- Giolitti and Carnevali, investigations of, 76, 88, 99
- Giolitti, Carnevali and Tavanti, investigations of, 167, 195
- Giolitti and Scavi, investigations of, 158, 160, 163, 168
- Giolitti and Tavanti, investigations of, 90, 94, 98, 133, 140
- Giolitti, investigations of, 70, 90  
on malleable castings, 98
- Gradual cements, 270
- Grain of cemented pieces, 92  
of cemented products, 377
- Granular carbon, as cementing agent, 322

- Grayson, investigations of, 138, 271  
 Grenet, investigations of, 276  
   on double quenching, 346  
   on hardening and annealing, 340  
   on uniformity of cementation, 364  
 Griffith and Guillet, investigations of, 121  
 Guillet and Griffith, investigations of, 121  
 Guillet, answer to Ledebur's criticisms, 62  
   cementation experiments of, 63  
   investigations of, 44, 46, 54, 264, 266, 268  
   on hardening and annealing, 340  
   on nitrogenous cements, 348  
   on regeneration quenching, 347
- Harbord, on theory of cementation, 38  
 Hardening, apparatus for, 340  
   cracks, cause of, 109  
   cemented pieces, theory of, 108  
   -*quenching*, 345  
   temperature of, 344  
 Hardenite, cementation by, 271  
 Hardness of cemented products, 381  
 Hard steel, manufacture of, viii  
 Helson, investigations of, 218  
 Hempel, investigations of, 26  
 Hertsch furnace, 244  
 Hogg, on diffusion of elements in iron, 39  
 Homogeneity of metal, effect of, 359  
 Huntsman, manufacture of crucible steel by, ix  
   production of crucible steel by, 200  
 Hyde and Coomes, patent process, 394  
 Hydrocarbons, cementation by, 48, 114, 181, 185
- Illuminating gas, as cementing agent, 65  
   cementation by, 76  
 Inert gas, effect of, on cementation, 330  
 Iron and carbon, equilibrium diagram of, 102  
 Iron, permeability to gases, 14
- Jagar, hardness test, 384  
 Jenkins, patent process, 393  
 Jones, patent process, 397  
 Jullien, observations of, 12
- Kirner, investigations of, 139  
 Krupp armor steel, cementation of, 333  
 Krupp steel, cementation of, 337
- Lake, on action of gases on steel, 301  
   experiments by, 267  
   on hardening and annealing, 340  
 Lamargese, patent process, 394  
 Lambert and Bannista, cementation tests of, 69  
 Langer, patent process, 391  
 Laurent, cementation theory of, 4  
 Lavoisier, classical researches of, xi  
 Lead, use in cementation process, 18  
 Leather, cementation by, 271  
 Lecarme, investigations of, 57  
   on anti-cements, 279  
   patent process, 393, 399  
   reply to LeChatelier's remarks, 58  
 LeChatelier, editorial on cementation theory, 64  
   pyrometer, 365  
   remarks on Lecarme's work, 57  
 Ledebur, cementation theory of, 39  
   comparative cementation experiments of, 60  
   discussion of theory of cementation, 59  
   review of Guillet's memoirs, 49  
 Leplay, cementation theory of, 3  
 Liquid cementation, xiv  
 Liquid cements, case hardening by, 279  
 Loehweiss, publications of, iv  
 Louis, on theory of cementation, 39  
 Lucas, cementation patent to, 202  
 Ludwik, hardness test, 384
- Machlet furnace, 287  
 MacIntosh, use of illuminating gas by, xiii  
 MacWilliam, and Arnold, investigations of, 33  
 Malleableized castings, theory of, 98  
 Manganese, action in cementation, 149  
   action of carbon monoxide on, 56  
   cementation of, 112  
   compounds, use in cementation, 398  
   diffusion of, into steel, 339  
   effect in cementation, 51  
   effect on metal during quenching, 349  
   in steel, function of, in cementation, 191  
   oxide, use in cementation, 399  
   steel, cementation of, 52, 53

- Mannesmann, cementation, theory of, 17, 21  
   investigations of, 14, 280  
 Mannesmann's reasoning, criticism of, 168  
 Marchand, on nitrogen in steel, 7  
 Margueritte, investigations of, 8  
   discussion with Caron, 11  
 Marsden, cementation theory of, 26  
 Mars, patent process, 396  
 Martens hardness test, 382  
 Mechanical characteristics of steel, 360  
   properties of chromium nickel steel, 361  
   of nickel chromium steel, 361  
   of nickel steel, 360  
 Metallic carbides, diffusion of, 338  
 Metallic cementation, 336, 338  
 Metals, diffusion of, into steel, 338, 339  
 Methane, cementation by, 76, 131  
 Microchemistry of cementation, Arnold on, 32  
 Micrographic examination of cemented steel, 69  
 Microscopic examination of cemented pieces, 389  
 Mixed cement, rules for cementation by, 158  
   advantages of, 305  
   case hardening by, 302  
 Mixtures for cementation, 262, 265  
 Molybdenum steel, cementation of, 52  
   cemented, heat treatment of, 356  
 Monge, cementation theory of, 3  
   on the constitution of steel, xi
- New Castle, beginning of cementation at, viii  
 Newton, cementation patent to, 202  
 Nickel-chromium steel, chemical composition of, 361  
   cementation of, 333, 337  
   mechanical properties of, 361  
 Nickel compounds, use in cementation, 398  
 Nickel, diffusion of, into steel, 339  
   oxide, use in cementation, 399  
   steel, cementation of, 52, 53, 113, 140, 145  
   cemented, heat treatment of, 350, 355  
   chemical composition of, 360
- Nickel steels, cemented, hardness of, 353  
   cementation of, 44  
 Nicolardot, discussion of Caron's experiments, 5  
 Nitrogen, action in cementation, 68  
   cementation in, 50, 120  
   cementation by, 139  
   in presence of, 180, 184  
   function in cementation, 10  
   its presence in steel, 7  
 Nitrogenous cements, 348  
 Non-cementing steels, 54
- Olsen, on action of gases on steel, 301  
 Osmond, cementation experiments of, 27  
   on the solubility of carbon in iron, 31
- Partial cementation, 222  
   by mixed cements, 302  
   with gaseous cements, 286  
   with liquid cements, 279  
   with solid cements, 225  
 Partiot, discussion by, 67  
 Patents for special cementation processes, 391  
 Penetration of cementation, velocity of, 20  
 Percy, on blisters on steel, 216  
   investigations of, 12  
 Percy's results, discussion of, 13  
 Permeability of iron to gases, 14  
 Petroleum vapor, as cementation agent, 65  
   cementation by, 17  
 Polishing of cemented steel, 373  
 Portevin and Berjot, investigations of, 136, 372, 387  
 Portevin, summary of Giolitti's investigations, 70  
 Potassium ferrocyanide, cementation by, 17  
 Pressure, cementation under, 142  
 Products, thermal treatment of, 340  
 Protecting varnishes, 285  
 Pyrometers, use of, 363
- Quenching, apparatus for, 340  
   cemented pieces, 51  
   double, usefulness of, 110  
   effect on mechanical properties, 349

- Quenching, temperature control of, 362  
temperature of, 344
- Quick cements, 270
- Raw materials, control of, 358
- Reaumur, theories of, 5,  
original furnace of, vi  
memoirs of, v
- Red scintilla, cementation by, 69
- Regeneration, of the core, 347  
-quenching, 344  
temperature of, 344
- Reiser, furnace, 282  
on hardening and annealing, 340
- Rhead and Wheeler, investigations of, 189
- Roberts-Austin, cementation theory of, 27  
observations of, 29
- Rockwell furnace, 249
- Roozeboom, on stability of cementite, 159
- Royston, investigations of, 30
- Ruthenberg, patent process, 396
- Salt, use in cementation process, 18, 262
- Saniter, experiments of, 31  
on diffusion of elements in iron, 39
- Saunderson, investigations and theory of, 6
- Scavi and Giolitti, investigations of, 158  
160, 163, 168
- Schafhaeutl, on nitrogen in steel, 7
- Scheele, researches on cast iron, xi
- Schenck and Seimmeler, investigations by, 191
- Schenck and Zimmermann, investigations of, 189
- Schenck, investigations of, 112, 149, 164  
on equilibrium of carbon and CO, 150  
on equilibrium of carbon and CO<sub>2</sub>, 329  
theory developed by, 188
- Schindler, investigations of, 361
- Scott, investigations of, 268  
observations of, 68
- Seeger cones, use in cementation, 212, 365
- Seimmeller and Schenck, investigations by, 191
- Sheffield, beginning of cementation at, viii  
cementation process at, 201
- Shock test of cemented products, 379
- Shore hardness test, 381
- Siemens pyrometer, 365
- Silicon, effect on metal during quenching, 349  
steel, cementation of, 52, 53
- Slag in steel, effect of, 359
