

explanation of the manner in which all individual life commences now, and how it is maintained.

This includes the relations between living beings and inorganic material, cell-life, and spontaneous generation. Afterward follows the various modes of reproduction in plants and animals, with full details in regard to human beings, including all the diseases incident to the generative organs in both sexes, with rules for their prevention and cure.

The whole book is so illustrated with cuts and plates that any one can readily understand every topic. It is, therefore, a reliable private instructor for those who wish to understand themselves, and a confidential hygienic and medical adviser, to which all can refer at need.

DR. F. HOLLICK,
P. O. Box 3606,
New York City.

CONTENTS.

PART I.

PRELIMINARY EXPLANATIONS ON MAN, MATTER, AND FORCE.

CHAPTER I.

GENERAL CONSIDERATIONS ON THE CONSTITUTION OF MAN..... 15

CHAPTER II.

DIFFERENCE BETWEEN WHAT ARE CALLED LIVING BODIES AND INORGANIC MATTER..... 18

PART II.

LIFE; WHAT IT IS.—PROTOPLASM, THE MATTER OF LIFE.—PRIMARY OR SPONTANEOUS GENERATION, NATURAL AND ARTIFICIAL.—THE DIFFERENT KINDS OF LIFE.—SIMILARITY BETWEEN PLANTS AND ANIMALS.

CHAPTER III.

WHAT IS LIFE?..... 23

CHAPTER IV.

ORIGIN OF PROTOPLASM, ITS USES, AND ITS PROGRESSION FROM THE INORGANIC TO THE ORGANIC WORLDS..... 25

CHAPTER V.

SPONTANEOUS GENERATION, AND ONENESS OF LIFE ALL THROUGH NATURE. 28

CHAPTER VI. PAGE

THE FIRST BEGINNINGS OF LIFE, AND ITS DIFFERENT KINDS..... 40

CHAPTER VII.

THE DIFFERENCE BETWEEN ORGANIC AND INORGANIC MATTER, AND THE RE-
LATION BETWEEN PLANTS AND ANIMALS..... 47

CONTENTS

PART III.

CELLS AND CELL LIFE.—ANIMAL AND VEGETABLE CELLS, AND THE
DIFFERENCE IN THEIR COMPOSITION.—THE LOWEST FORMS
OF LIVING BEINGS: THEIR UNIVERSAL DIFFUSION
AND VARIETIES.—THE GERM THEORY OF
DISEASE.

CHAPTER VIII.

THE FIRST FORMS OF LIVING ORGANISMS—VESICLES AND CELLS..... 63

CHAPTER IX.

UNIVERSALITY OF THE LOWER ORGANISMS, AND THEIR VARIETIES..... 71

PART IV.

AGGREGATION OF CELLS INTO COMPOUND ORGANISMS.

CHAPTER X.

AGGREGATION OF CELLS INTO COLONIES AND COMPOUND ORGANISMS..... 93

PART V.

EVOLUTION.—ORGANIC AND EMBRYONIC DEVELOPMENT

CHAPTER XI.

EVOLUTION..... 101

A Change of Species..... 109

PART VI.

CLASSIFICATION OF ANIMALS, AND THEIR DIFFERENT TYPES.

CHAPTER XII. PAGE

THE VARIOUS FORMS OF LIVING BEINGS, OR TYPES..... 113

CHAPTER XIII.

THE DIFFERENT TYPES OF ANIMALS..... 115

CHAPTER XIV.

PLAN OF DEVELOPMENT OF ANIMALS..... 118

PART VII.

REPRODUCTION IN PLANTS AND ANIMALS, SEXUAL AND NON-SEXUAL,
INCLUDING HERMAPHRODISM.

CHAPTER XV.

REPRODUCTION..... 123

CHAPTER XVI.

NON-SEXUAL REPRODUCTION..... 125

CHAPTER XVII.

SEXUAL REPRODUCTION..... 132

Hermaphrodisms..... 132

The Two Sexes united in One Individual..... 132

PART VIII.

DIOECIOUS GENERATION.—THE TWO SEXES DIVIDED.—THE FEMALE EGG
AND MALE SPERM.—CONJUNCTION OF THE SEXES.
—IMPREGNATION.

CHAPTER XVIII.

THE SEXES DIVIDED, THE MALE ORGANS BEING IN ONE INDIVIDUAL AND
THE FEMALE IN ANOTHER..... 141

	PAGE
Diœcious.....	141
The Ovarium or Ovary, with the Ovum or Egg.....	141
The Ovary or Ovarium, and the Ovum.....	143
The Testicles and the Semen.....	161
Anomalies in the Size and Apparent Number of the Testes.....	164
The Semen and the Seminal Animalcules.....	170

CHAPTER XIX.

IMPREGNATION, EXTERNAL AND INTERNAL.....	184
Pouchet's Ten Fundamental Laws which Govern the Process of Fecundation.....	184
When Conception is Possible and Impossible.....	191
Manner of Impregnation.....	194

CHAPTER XX.

SEXUAL UNION, OR COPULATION.....	203
----------------------------------	-----

PART IX.

THE ORGANS OF GENERATION IN BOTH SEXES, AND IN THE DIFFERENT TYPES OF ANIMALS.

CHAPTER XXI.

THE ORGANS OF GENERATION IN OVIPAROUS ANIMALS.....	211
--	-----

CHAPTER XXII.

ORGANS OF GENERATION IN VIVIPAROUS ANIMALS.....	220
Human Female Organs.....	220
Proofs of Violation.....	228
The Fallopian Tubes.....	230
The Womb.....	244
The Vagina.....	238
Human Male Organs.....	241
Absence and Malformation of the Penis.....	247
Want of Development, or Congenital Small Size of the Penis.....	248
Generative Organs of the Marsupials.....	258
Monotremata.....	261
Non-Sexual Generation.....	263
Sexual Generation.....	263
Manner of Development.....	263

CHAPTER XXIII.

THEORIES OF GENERATION.....	PAGE
	264

PART X.

REPRODUCTIVE ORGANS IN PLANTS, AND THEIR CORRESPONDENCE WITH THOSE OF ANIMALS.

CHAPTER XXIV.

ORGANS OF GENERATION IN PLANTS.....	271
-------------------------------------	-----

PART XI.

PARTHENOGENESIS, OR VIRGIN GENERATION ; AND THE ALTERNATION OF GENERATIONS.

CHAPTER XXV.

VIRGIN GENERATION.....	285
------------------------	-----

PART XII.

DEVELOPMENT OF THE NEW BEING.

CHAPTER XXVI.

FIRST CHANGES OBSERVED IN THE OVUM AFTER FECUNDATION, AND THE WAY THE EMBRYO BECOMES CONNECTED WITH THE MOTHER.....	299
---	-----

CHAPTER XXVII.

DEVELOPMENT OF THE NEW BEING FROM THE GERM.....	302
---	-----

CHAPTER XXVIII.

FœTAL NUTRITION.....	323
Peculiarities of the Fœtal Circulation.....	325

CHAPTER XXIX.

EXTRA-UTERINE CONCEPTION, AND UNNATURAL OR MONSTROUS GROWTHS....	329
Formation of one Child within Another.....	330
False Conceptions.....	334
Deformities and Monstrosities.....	335
Remarkable Case of a Fœtal Monstrosity.....	337
Monstrosity.—Deficiency of Parts.....	338
Redundancy of Parts.....	340
Origin of Monstrosities.....	345
Double People.....	344
Twins and Superfoetation.....	345
Plural Births.....	347
Miscellaneous Matters Connected with the Foregoing Topics.....	350

CHAPTER XXX.

DURATION OF PREGNANCY, AND PERIOD WHEN THE CHILD CAN LIVE.....	353

PART XIV.

SPECIAL DISEASES OF THE GENERATIVE ORGANS, MALE AND FEMALE.

CHAPTER XLVI.		PAGE
DISEASES, MALFORMATIONS, AND DERANGEMENTS OF THE MALE SYSTEM.....		489
Hydrocele, or Dropsy of the Testicle		489
Sarcocele, or Chronic Fleasy Swelling of the Testicle		495
Fungus of the Testicle.....		497
Ossification of the Testicle.....		502
Arrest of Development and Wasting of the Testes.....		502
Tubercular Disease, or Consumption of the Testicle.....		505
Foreign Bodies in the Scrotum along with the Testicles		506
Nervous Affections of the Testicles.....		506
Spermatocele, or Swelling of the Testes from Engorgement of Semen ..		509
Scrotocele, or Rupture of the Intestines or Omentum into the Scrotum.		510
Varicocele and Circocele, or Swelling of the Veins of the Scrotum and Spermatic Cord.....		511
Hæmatocele, or Swelling of the Scrotum and Spermatic Cord from the Effusion of Blood.....		513
Prurigo, or Itching of the Scrotum		513
Elephantiasis Scroti.....		514
Falling of the Spermatic Cord.....		516
Relaxation of the Scrotum.....		517
Diseases of the Vasa Deferentia.....		518
Diseases of the Seminal Vesicles		519
Hypospadias.....		519
Epispadias		521
Phymosis		522
Paraphymosis		522
Paralysis of the Muscles of the Penis.....		523
Priapism, or Involuntary Erection		523
Diseases of the Urethra and the Parts contained therein		526
The Prostate Gland.....		529
Excessive Sensibility of the Genital Organs.....		531

PART XV.

DISEASES OF THE FEMALE ORGANS.

CHAPTER LII.

MALFORMATION, OR IMPERFECT DEVELOPMENT OF THE DIFFERENT FEMALE ORGANS	603
Cohesion of the External Lips.....	603
Union of the Nymphæ	604
Unnatural Growth of the Nymphæ	604
Unnatural Growth of the Clitoris.....	604
Closure of the Vagina	605
Partial Closure, or Narrowness of the Vagina	606
Closing of the Mouth of the Womb	607
Absence of the Vagina, or Womb, or both	607

CHAPTER LIII.

DISPLACEMENT OR WRONG POSITION OF THE FEMALE ORGANS.....	609
Prolapsus Uteri, or Falling of the Womb.....	609
The Pessary.....	615
Treatment and Probability of Cure	619

Anteversio and Retroversio of the Womb.....	622
Anteflexio and Retroflexio of the Womb.....	627
Obliquity of the Womb.....	627
Inversio of the Womb.....	627
Fixturo of the Womb, or Immobility.....	628
Hysterocele, or Hernia of the Womb.....	630
Cystocele, or Hernia of the Bladder.....	630
Vaginal Enterocoele, or Hernia of the Intestine into the Vagina.....	632
Inversio and Swelling of the Lining Membrane of the Vagina.....	632

CHAPTER LIV.

VITAL AND ORGANIC DISEASES.....	634
Inflammation of the Vulva and External Lips.....	634
Prurigo of the Vulva, or Itching of the External Parts.....	635
Vaginitis, or Inflammation of the Vagina.....	636
Metritis, or Inflammation of the Womb.....	636
Engorgement, or Enlargement of the Womb.....	640
Scirrhus, or Cancerous Engorgement of the Womb.....	641
Rheumatism of the Womb.....	642
Leucorrhœa, or Fluor Albus.....	643
Polypus of the Womb.....	648
Hydrometra, or Dropsy of the Womb.....	650
Hydatids of the Womb.....	651
Calculus, or Stone in the Womb and Vagina.....	654
Inflammation of the Ovaries and Fallopian Tubes.....	655
Dropsy of the Ovaries and Fallopian Tubes.....	657

CHAPTER LV.

DERANGEMENT OF THE FUNCTIONS OF THE FEMALE ORGANS, AND OF THE NERVES.....	660
Amenorrhœa, or Non-appearance, or Stoppage, of the Menses.....	660
Dysmenorrhœa, or Painful Menstruation.....	666
Profuse Menstruation, or Flooding.....	670
Chlorosis, or Green Sickness.....	673
Hysteria.....	678
Hysteralgia.....	687

“ 61.—Male Organs of Buccinum, or Water Snail.....	213
“ 62.—External Sexual Organs of the Human Female, before marriage.....	221
“ 63.—External Organs of the Human Female after marriage.....	221
“ 64.—The Womb shown cut open.....	229
“ 65.—Human Semen, Recent and Dried.....	230
“ 66.—Perfect Hymen.....	230
“ 67.—After Violent Rupture.....	230
“ 68, 69.—Internal Female Organs.....	231
“ 70.—Section of the Womb, natural size.....	235
“ 71, 72.—The Womb and its Appendages separate from the body.....	235
“ 73.—Section of the Male Pelvis, to show the Situation of the Different Parts.....	243
“ 74.—Section of Penis and Bladder.....	250
“ 75.—Young Kangaroo, just born.....	261
“ 76.—Young Kangaroo in its Mother's Pouch, adhering to the Teat.....	261
“ 77.—Flower of the Lily.....	273
“ 78, 79, 80, 81.—The Stamens, Pistils, and Germs, in Plants.....	274
“ 82.—The Stamens placed on the lower part of the Petals.....	276
“ 83.—The Stamens placed on the Germ Cell.....	276
“ 84.—Pistil of the Poppy.....	276
“ 85.—Pistil of the Madder-plant.....	276
“ 86.—The Vallisneria Spiralis.....	277
“ 87.—Various forms of Pollen Grains.....	278
“ 88.—A Plant of the Bastard Dittany, inclosed in a glass case to confine the Inflammable Vapors which arise from it.....	279
“ 89.—Union of Vegetable Cells.....	281
“ 90.—Parthenogenesis of the Rose Aphis.....	287
“ 91.—The Tapeworm in various stages.....	291
“ 92.—Tapeworm of the Lark, and Tapeworm of the Cat.....	292

	PAGE
FIGURE 93.—Various stages in the Development of the Jelly-Fish.....	293
“ 94.—The perfect Medusa or Jelly-Fish.....	293
“ 95, 96.—Some of the most remarkable Parasites found upon Fish and Crustaceans.....	294
“ 97.—Ovum from the Ovary of a Female Dog, in heat.....	300
“ 98.—The same Ovum as in the preceding plate, showing the disappearance of the club-shaped cells.....	300
“ 99, 100.—Formation of the Decidua.....	300
“ 101.—Division of the Yelk in Eggs of Ascaris.....	302
“ 102.—Division of the Yelk in Egg of the Dog.....	303
“ 103.—Cells of the Ovum.....	304
“ 104.—The Blastodermic Vesicle.....	304
“ 105.—First Changes in the Germinative Area.....	304
“ 106.—Ovum more advanced, showing the beginning of the Brain and Spinal Column.....	304
“ 107.—Diagram of the Human Ovum at about the Second Month of Embryonic Life.....	307
“ 108.—Urinary and Generative Organs of the Human Embryo, when about three and a half inches long.....	313
“ 109.—Connection between the Womb and Placenta.....	328
“ 110.—Singular Monstrosity.....	337
“ 111.—Double Monstrosity united at the Sternum.....	338
“ 112.—Double Monstrosity united laterally.....	339
“ 113.—The Sacrum, and Os Coccygis.....	352
“ 114, 115.—A Remarkable Case of Hermaphroditism.....	381
“ 116.—Waist of Venus de Medicis.....	417
“ 117.—Waist of a Fashionable Lady.....	417
“ 118.—Remarkable Hybrid, from the New Forest. Drawn from Life by George Landseer.....	484
“ 119, 120, 121.—A case of Hydrocele laid open.....	489
“ 122, 123.—Elephantiasis Scroti.....	515
“ 124.—Varicocele, Falling of the Cord, or Dropped Testicle.....	517
“ 125.—Lateral Section of the Female Pelvis, to show the position of the Organs in their Natural State.....	610
“ 126.—Lateral Section of the Female Pelvis, to show the position of the Womb in the First Stage of Prolapsus.....	610
“ 127.—Lateral Section of the Pelvis, to show the position of the Womb, and other Organs, in the Second Stage of Prolapsus.....	610
“ 128.—A Globe Pessary, supporting the Uterus.....	616
“ 129.—Anteversion.....	625

	PAGE
FIGURE 130.—Retroversion	625
“ 131.—Vertical Section of the Womb and Vagina, natural size.....	757
“ 132, 133, 134 and 135.—The Muscular Fibers of the Womb.....	758
“ 136.—Bones of the Pelvis.....	760
“ 137.—Section of the Pelvis.....	760
“ 138.—Diameters of the Upper Strait.....	761
“ 139.—The Bones of the Pelvis viewed from below, looking through the Inferior Strait, to show its Diameters.....	761
“ 140.—The Diameters of the Pelvis.....	762
“ 141.—Fœtus at 3 months inclosed in the Membranes.....	763
“ 142.—Fœtus at 6 weeks.....	763
“ 143.—Embryo at 12 days.....	763
“ 144.—Embryo at 21 days.....	763
“ 145.—Form of Fœtus at 45 days.....	763
“ 146.—The Breast.....	764
“ 147.—View of the Breast about the fourth month.....	770
“ 148, 149, 150.—The form and size of the body, neck, and mouth of the Womb, at about the third, seventh, and ninth months.....	773
“ 151.—Primipara, or the First Pregnancy.....	774
“ 152.—Woman who has borne Children before.....	774
“ 153.—Mode of performing Ballotment to detect Pregnancy.....	775
“ 154.—Neck of the Womb in a First Pregnancy, and in a Female who has borne Children before.....	777
“ 155.—First Child; Woman who has borne Children.....	779
“ 156.—Represents the Fœtus in the most usual position, the head down- ward, and the back of it presenting to the left side.....	780
“ 157.—Represents the Fœtus in the next most frequent position, the head downward, but the back of it presenting to the right side.....	780
“ 158.—Shows the position of the Fœtus in a Presentation of the Pel- vis, or Breech.....	781
“ 159.—Represents the position of Twins, as most usually observed, one having a Head Presentation, and the other a Breech.....	781
“ 160.—Neck of the Womb, at or near the end of nine months in a Primipara, and in a Woman who has previously borne Children.....	782
“ 161-2.—The Fœtal Head.....	783
“ 163-4.—Diameters of the Head.....	784
“ 165.—Attitude of the Fœtus.....	785
“ 166.—Represents the Neck straightened out, and the Two Fontanelles on a line with each other.....	794

	PAGE
FIGURE 167.—Represents the Head descended still lower in the Pelvis.....	794
“ 168.—Represents the Head still further down, and beginning to rotate.....	795
“ 169.—Represents the back of the Head nearly under the Pubic Bone, while the Forehead is just passing the External Opening below.....	796
“ 170.—Represents the back of the Head completely extruded, and also the Chin, so that the whole Head is now born.....	796
“ 171.—Head in the Right Anterior Occipito-Iliac Position.....	797
“ 172.—Delivery in a Breech Presentation, the Buttocks having just passed the Vulva.....	800
“ 173.—Anterior Posterior Position of the Head, the Occiput being in front, after the delivery of the Body.....	800
“ 174.—The Chin just passed, in Presentation of the Face.....	803
“ 175.—The Head full born, in Face Presentation.....	803
“ 176.—Position of the Fœtus in a Presentation of the Right Shoulder, and in the Left Cephalo-Iliac Position.....	806
“ 177.—Descent of the Shoulder in a Trunk Presentation, at a more advanced period.....	806
“ 178.—Descent of the Shoulder and Trunk at a still later period.....	806
“ 179.—The Trunk fully descended, and only the Head left, with one Arm.....	806
“ 180.—State of the Parts at the beginning of Labor.....	810
“ 181.—State of the Parts at the end of the First Period.....	810
“ 182.—The manner of supporting the Perineum, during the Passage of the Head.....	819
“ 183.—Represents the Standard Form of the Pelvis.....	835
“ 184.—Masculine Pelvis.....	835
“ 185.—Represents the peculiar Deformity most frequently produced by Mollities Ossium.....	835
“ 186.—An Ovate Pelvis.....	835
“ 187.—Another Deformity, in which one side is sunk below the other, and both twisted round the Sacrum.....	836
“ 188.—The effect of Corroding Disease in the Pelvis.....	836
“ 189.—Represents the Head fixed or impacted at the Upper Strait of a narrow Pelvis.....	837
“ 190.—Case of Tumor in the Vagina.....	839
“ 191.—Case of Polypus in the Vagina.....	839
“ 192, 193.—Limbs cut off by the Cord.....	842
“ 194, 195.—Forceps.....	864
“ 196.—The Head being drawn through a narrow Pelvis, by the Forceps.....	867
